Steps to run Project:

1. Go to project directory and type "npm install" in the terminal
2. Type "node database-initializer.js" in the terminal
3. Press control+c after console displays that database is initialized
4. Type "node server.js" in the terminal
5. Go to any browser and type <http://localhost:3000/> in the terminal

Design Discussion and Critique: I think my design could use some CSS but overall is pretty good because it is intuitive, simple, and easy to use.

I did not add any extra functionality.
